The mold expert for my condo at **#SandsPointe** in **#SunnyIslesBeach** attributes Spike's **#pulmonaryfibrosis** to mold, fungus and other related poison from damages suffered during the hurricanes of 2005.

The association "attorneys" have yet to provide any evidence or even "mold studies" to the contrary. Wonder if they have alerted the residents of the building absent any attempt at providing evidence to the contrary.

Pulmonary Fibrosis is a horrible disease. Spike is in a human/canine trial under FDA controls.

Why not inform the building's residents? The insurance carrier[s] & Association declared my condo "a laboratory" to fix the building; but, have yet to remediate the mold. Why not hire other mold experts to corroborate or counter the position (as you said you would over one year ago)? Why not inform the residents?

I have faith in the Association attorneys that all insurance providers have been put on notice about the festering issues.

Then again, the Association attorneys have had a high turnover, with all of the unemployment now in South Florida, of about 3 or 4 attorneys?

What is being hidden? You represented that the apartment could be fixed and that damages would be paid - preliminary injunction dated June 15, 2011.

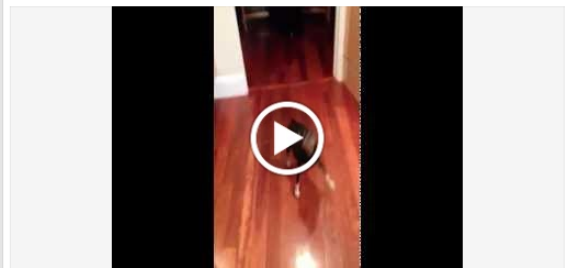

What exactly is going on? I fear for the lives of those that do not know all of the facts.

I eagerly await the Association and the insurer's latest attorney to provide transparency. Four mediation cancellations since November, 2011 are not appropriate. Neither is property conveyance.

What does the wind study data say? What is the current wind study on the roof of **#SandsPointe** say?

Not just data, P&A, what are the models for the inputs and outputs - garbage in/ garbage out - just doesn't work - especially when you admit to the potential if revocation of the CO ...
